Education

University of St. Thomas
B.S. in Computer Science

December 2023
St. Paul, MN

Work Experience

Argos Risk

May 2022 – May 2023

Software Development Intern

Edina, MN

- Key team member in a companywide migration from Sugar (CRM) to HubSpot.
- Built functional tools used to draft email campaigns.
- Automated the process of sorting and organizing email lists needed for marketing campaigns.
- Created chatbots for the public-facing and subscriber-facing websites.
- Designed a churn monitoring algorithm and tool based on Argos Risk's subscriber license, which allowed for the company to ensure compliance of subscribers, in line with their customer contracts, a vital step in decreasing Argos Risk's cost of doing business.

Fortive

May 2019 – August 2019

Application Development Intern

Woodbury, MN

- Built financial modeling tools in Excel, which were used by the strategic planning team for the 2020-2022 plan.
- Built Excel macros in Visual Basic for Applications to automate data collection and analysis needed for the accounting team's monthly reporting.
- Leveraged proficiency in Microsoft Flow and SharePoint to develop a web-based application for employee interaction during Kaizen events.

Projects

From Nand To Tetris - Solo Development

December 2023 - April 2024

- A computer engineering passion project and learning experience done in order to better understand the fundamentals of computing.
- The project begins with elementary logic gates and ends with a working HACK computer with a custom machine language, assembler, virtual machine, high level language, compiler, and operating system.
- Based on the book *The Elements of Computing Systems: Building a Modern Computer from First Principles* by Noam Nisan and Shimon Schocken.

Sycamore Integration - Group Leader

August 2023 - December 2023

- Volunteered to help maintain and improve a tuition management web application used by Risen Christ Catholic School in St. Paul.
- Focus was on improving data management by integrating the existing tuition management application with the Sycamore School API, a cloud-based school management and student information system (SIS).
- Was responsible for managing a team of six students during 4, two-week sprints.
- Used IntelliJ IDEA as the IDE and for project building, alongside Apache Maven and Apache Tomcat. Code for the project was written in Java and JavaScript, with JSP and CSS comprising the frontend of the project.
